Language Arts

English 9

Duration: one year

Intended Level: 9

Prerequisites: English 8

Course Description: English 9 is a comprehensive course covering vocabulary, grammar, literature, the six traits, and composition. Material is covered through daily assignments, lecture, group discussion, writing, and projects. Evaluation is based on students' performance in class as well as on daily work, homework, quizzes, tests, compositions, and projects.

Practical English 9

Duration: one year

Intended Level: 9

Prerequisites: English 8

Course Description: In this course, students will have an in-depth review of the parts of speech and their usage. They will also work on improving their writing and listening skills. Literature from a variety of genres will be explored. Material will be covered through daily activities, group work, and projects. Evaluation is based on daily work, tests, homework, quizzes, compositions and projects.

Honors English 9

Duration: one year

Intended Level: 9

Prerequisites: English 8, meeting DC West established criteria for honors classes

Course Description: Honors English 9 is a comprehensive course for accelerated, highly motivated, independent learners. The curriculum includes a survey of literary genres, vocabulary, composition, literary analysis, and oral presentations. Students will practice and apply the six traits of writing and will prepare a writing portfolio. Grades are based on daily work, homework, quizzes, tests, compositions, projects, and portfolios.

English 10

Duration: one year

Intended Level: 10

Prerequisites: English 9

Course Description: English 10 is a comprehensive course based on American literature with work in reading skills, grammar, vocabulary, and composition. Students will study the six traits of writing as well as the backgrounds of various authors and literary movements including Romanticism, Transcendentalism, Realism, and Naturalism. Evaluation is based on homework, notes, tests, quizzes, compositions, class discussion, and projects.

Practical English 10

Duration: one year

Intended Level: 10

Prerequisites: Practical or English 9

Course Description: In this course, students will focus on reviewing the correct usage of grammar, punctuation, and capitalization. The students will work on improving their writing skills and reading

comprehension. The make-up of this class will dictate the amount of time spent on each skill and the choice of literary selections. Evaluation is based on daily work, tests, homework, quizzes, and compositions.

Honors English 10

Duration: one year

Intended Level: 10

Prerequisites: English 9, meeting DC West established criteria for honors classes

Course Description: Honors English 10 is a comprehensive course for accelerated, highly motivated independent learners. The curriculum is based in American Literature with work in reading skills, grammar, vocabulary and composition. Students will study the six traits of writing as well as the backgrounds of various authors and literary movements including Romanticism, Transcendentalism, Realism, and Naturalism. Students will prepare a portfolio of their writing each quarter. Evaluation is based on homework, notes, tests, quizzes, compositions, class discussion, projects and outside reading.

English 11

Duration: one year

Intended Level: 11

Prerequisites: English 9,10.

Course Description: English 11 is a comprehensive course based on World literature, composition, grammar and vocabulary. First semester includes a major research paper. This research paper consists of one-third of the students' final semester grade. In order to pass this course, students must pass each component of the junior research paper. Evaluation is based on daily work, homework, quizzes, tests, compositions, projects, and the Nebraska State Assessments.

Practical English 11

Duration: one year

Intended Level: 11

Prerequisites: Practical or English 9,10

Course Description: Practical English 11 is a comprehensive course based on multicultural literature, composition, six trait writing, grammar and vocabulary. First semester includes a modified research paper. This research paper consists of one-third of the students' final semester grade. In order to pass this course, students must pass each component of the junior research paper. Evaluation is based on daily work, homework, quizzes, tests, compositions, projects, and the Nebraska State Assessments.

Honors English 11

Duration: one year

Intended Level: 11

Prerequisites: English 9, 10, meeting DC West established criteria for honors classes

Course Description: Honors English 11 is a comprehensive course for accelerated, highly motivated, independent learners. The course content will focus on different aspects and elements of World Literature, composition, grammar, and vocabulary. First semester includes a major research paper. This research paper consists of one-third of the students' final semester grade. In order to pass this course, students must pass each component of the junior research paper. Evaluation is based on daily work, homework, quizzes, tests, compositions, projects, portfolio, and the Nebraska State Assessments.

English 12

Duration: one year

Intended Level: 12

Prerequisites: English 9,10,11

Course Description: English 12 is a comprehensive college preparatory course based on the study of British Literature. Reading skills, writing skills and techniques, essay writing, and vocabulary study are integral to the course. Evaluation is based on class participation (including class discussion and in-class writing), homework completion, quizzes, tests, and compositions.

Practical English 12

Duration: one year

Intended Level: 12

Prerequisites: Practical or English 9,10,11

Course Description: In this course, students will focus on improving their skills in the areas of writing, reading comprehension, vocabulary, listening, and speaking. This class is designed to help students make a smooth transition into the workplace or some level of post-graduate work. Curriculum will include topics related to both work and school environments. Evaluation will be based on daily work, tests, quizzes, compositions, and projects.

Honors English 12

Duration: one year

Intended Level: 12

Prerequisites: English 9, 10, 11, meeting DC West established criteria for honors classes

Course Description: This course is for college bound, advanced English students, and will be offered only if a student isn't able to take the Metro English class. Students will study British Literature, including Anglo Saxon literature and works by the authors Chaucer, Shakespeare, Donne, Bacon, Swift, Voltaire, Blake, Coleridge, Tennyson, Browning, among others. Students will develop and demonstrate sophisticated learning skills in the higher realms of Bloom's Taxonomy through: essays; research writing; projects; scenarios; and presentations. In order to prepare students for college English, and in order to fulfill the needs of gifted students, this course will be a more intense experience (involving great effort and much activity) for students than another English 12 class. The class expectations will model college expectations so that students have practiced this type of learning in the safe, nurturing high school environment.

Metro English (Composition I and II)

Duration: One Semester

Intended Grade Level: 11-12

Prerequisites: English 9 and 10, permission from the department

Comp. I (ENGL 1010): Students cultivate critical thinking, analytical reading, and systematic writing practices that are foundational to college-level academic writing. Students are expected to expand their own knowledge, openly engaging with new and challenging ideas through reflection, analysis, and critique. Students practice expressing these complex ideas in multiple genres, focusing on expository and persuasive writing. Using writing as a process that includes planning, drafting, instructor and peer feedback, revision, and reflection, students compose 3 major thesis-driven essays and produce 15-18 pages of polished prose. Students will become self-aware, independent, confident writers who take ownership of their own writing process.

Comp II (ENGL 1020): Students build on Composition I skills by becoming better critical readers, researchers, and writers. Students design, draft, revise, and edit arguments for specific audiences and purposes. Using research, analysis, and integration of primary and secondary sources, students compose 18-25 pages of polished prose, including one paper of 10-12 pages, with an emphasis on thesis-driven argumentative writing.

Introduction to Literature

Duration: one semester

Intended Level: 10-12

Prerequisites: none

Course Description: Students explore the genres, elements, and themes of literature by critically reading, discussing, and responding in writing to a culturally diverse selection of works. Fiction, poetry, and drama are emphasized. Students learn to appreciate literature as essential to understanding self and society.

Metro Ethnic Literature

Duration: One Semester

Intended Grade Level: 11-12

Prerequisites: English 9 and 10, permission from the department

ENGL 2530: Students explore the genres, mediums, elements, and themes of U.S. ethnic literature through critical reading, discussion, and written responses. Students read a selection of works by authors who reflect diverse ethnic/cultural backgrounds. Students internalize new perspectives and learn to appreciate literature as essential to understanding self and society.

Metro British Literature

Duration: One Semester

Intended Grade Level: 11-12

Prerequisites: English 9 and 10, permission from the department

ENGL 2610: Students explore literature from the 7th to the 18th centuries and study the ways in which Britain developed its literary identity over the course of this period. The literature written during this period brings to life the religious, social, and political climate of the time. By critically reading, discussing, and responding in writing to a variety of early British texts, students explore themes such as origins, faith, freedom, and identity.

Metro Creative Writing I

Duration: one semester

Intended Level: 9-12

Course Description: Creative Writing is designed as a semester workshop course for students in grades 10-12. Class activities include journaling, peer editing, maintaining portfolios, sharing writing experiences, and participation in publication of the creative writing book: *Inspired*. Writing experiences include the following: techniques of creating dominant impression, using sensory imagery, utilizing techniques of fiction and nonfiction in essay writing. Evaluation is based upon adherence to the six trait writing concept, class participation in discussion, in-class writing, completion of homework, and meeting writing deadlines.

Digital Journalism

Duration: one year

Intended Level: 9-12

Prerequisites: Permission from the instructor

Course Description: Publications/Yearbook is a two-semester instructional and laboratory course wherein the students plan, design, and develop the school yearbook. Good writing and editing skills are essential. During

the first quarter, students will study yearbook terminology, review basic writing techniques and skills, develop essays, captions, etc., and study and facilitate basic designs of a yearbook spread. Evaluation for this section is based on the following: class participation, quizzes and tests, completed layouts. During the remainder of the course members select a theme, design layouts, do interviews, and write stories, captions, headlines that record the school's history for the year. In addition, students are required to sell advertisements and distribute the books once they are published. Students are expected to demonstrate self-discipline and to be highly motivated. The ability to work as part of a team is an important characteristic for successful completion of the course. Students are evaluated on class participation (which includes participating in discussions and decision making, staying on task), quality of layouts and copy, and meeting of all deadlines. This class may be repeated.

Young Adult Literature

Duration: one year

Intended Level: 11-12 (10, instructor permission only)

Prerequisites: None

Course Description: Young Adult Literature (YAL) is designed as a workshop class in which students will explore and evaluate various genres (types) of contemporary young adult literature in order to engage students in discussions of literature and life. Some of the literature will be assigned while other selections will be of the student's choice. Throughout the class, we want to "RWSLVT" _read, write, speak, listen, view, and think (Governor's State U 2010).

Contemporary Literature and Film

Duration: one semester

Intended Level: 11-12 (9-10 instructor permission only)

Prerequisites: permission from instructor

Course Description: This course examines the relationships between literary and cinematic forms. Through careful reading/viewing, discussion, and written analysis of novels, short stories, plays, and their cinematic adaptations, students will come to a greater understanding of the characteristics of each medium and their evolution. Students who complete this course should be able to:

- Analyze and describe the differences between cinematic, literary, and dramatic uses of plot, characterization, point of view, and setting.
- Explain and demonstrate an understanding of various interpretive strategies, theories, and problems in adapting fiction or drama for film.
- Recognize and interpret thematic differences between a film and the literary work it is based on and between various film versions of the same work.
- Demonstrate interpretive analysis of film and literature through coherent writing.

Dystopian Literature

Duration: one semester

Intended Level: 11-12 (9-10 instructor permission only)

Prerequisites: permission from instructor

Course Description: This course will introduce students to an array of literature and film that focuses on dystopian societies and the themes inherent in such works, including the struggle for survival, the pressure to conform, the dream of hope, and the role of nature. The course will include assigned texts as well as student selected texts. Students who complete this course should be able to:

- Analyze and describe the differences between Utopian and Dystopian Societies

- Explain and demonstrate an understanding of various interpretive strategies, theories, and problems in adapting fiction or drama for film.
- Analyze trends and themes in current events and how they translate to Dystopian Literature
- Demonstrate interpretive analysis of literature through coherent writing

Sports in Literature

Duration: one semester

Intended Level: 11-12 (9-10 instructor permission only)

Prerequisites: permission from instructor

Course Description: This course will allow the students who need a high interest, timely sports-related literature as motivation to enjoy reading and researching. The students will analyze and dissect novels and a plethora of informational texts while discussing, researching, and presenting information. Sports Literature will consist of an examination of the connection between sport and society from several perspectives through interaction with literature presented by authors from various genres. This course will prepare students for the challenging reading and writing they will encounter in college and beyond. Through the use of sports literature and other media forms, the primary objective is to develop a greater sensitivity to the world of sports and understand the relationship of sports and society.

Competitive Speech

Duration: 1st Semester

Intended Level: 10-12 or member of the speech team

Prerequisite: Permission from the instructor, Member of the Speech Team

Course Description: This semester course is designed for students interested in competition speaking. Skills in public speaking and oral interpretation of literature will be emphasized. Students will be graded on daily assignments, writing assignments, class participation and tournament attendance. **Students will be required to attend practices and team meetings as well as compete in six speech tournaments.**

CTE - English 1220 Technical Writing (online through Metropolitan Community College)

Students are proctored by staff at DC West

Students produce technical papers and reports demonstrating clear written expression of ideas. Important considerations include the format, organization, logic, and sentence construction of reports. Students focus on the process of writing, including designing, revising, and editing technical documents. This is a level I class.

CTE - English 1240 Oral and Written Reports

Students continue to develop writing and critical thinking skills learned in their Level-1 English course by integrating outside research into their own writing. Students research, analyze, and organize primary and secondary sources of information and demonstrate their critical thinking through oral and written technical and workplace reports.

Mathematics

General Math

Duration: one year

Intended Level: 9-12

Prerequisites: Math 8 & recommendation from the math department.

Course Description: This is a basic course in arithmetic and an introductory course to Pre-Algebra. It is designed to teach the use of whole numbers, fractions, decimals and integers. Basic pre-algebra skills will be introduced at a beginning level.

Pre-Algebra

Duration: one year

Intended Level: 9-10

Prerequisites: Math 8 or General Math

Course Description: This is the final course in arithmetic and an introductory course to algebra. It is designed to automate the use of whole numbers, fractions, decimals, and integers. Simplifying algebraic expressions and solving equations is introduced. There is an emphasis on problem solving using charts and graphs, averages, percents, equations, ratios and proportions.

Algebra I

Duration: one year

Intended Level: 9-12

Prerequisites: Pre-Algebra

Course Description: This is a one year course that develops the skills learned in Pre-Algebra. Topics covered include solving equations, order of operations, exponents, signed numbers and radicals. Factoring of polynomials is first introduced here as well as graphing linear equations using the slope-intercept method.

Algebra I Support (elective credit)

Duration: one year

Intended Level: 9-12

Prerequisites: Enrolled in Algebra I, based on teacher recommendations and standardized test results

Course Description: This course is designed to increase the time for Algebra I instruction. Students will receive additional classroom instruction and support to supplement the Algebra I curriculum. Instruction will include a combination of pre-instruction and reinforcement of topics to support the Algebra curriculum.

Algebra II

Duration: one year

Intended Level: 10-12

Prerequisites: Algebra I

Course Description: This is a one year course that develops the skills learned in Algebra I while applying those skills in a variety of problem solving situations. Topics introduced in this course include solving systems of equations and inequalities with 2 or more variables, vectors, quadratic equations, variations, functions, conjunctions and disjunctions.

Algebra II Support (elective credit)

Duration: one year

Intended Level: 9-12

Prerequisites: Enrolled in Algebra II, based on teacher recommendations, and standardized test results

Course Description: This course is designed to increase the time for Algebra II instruction. Instruction will include a combination of pre-instruction and reinforcement of topics to support the Algebra II curriculum.

College Algebra

Duration: one semester

Intended Level: 11-12

Prerequisites: completion of Algebra II

Course Description: This course extends algebra skills and provides the background necessary for further mathematics courses. Topics included are: functions and their inverses; polynomial, radical exponential, and rational expressions; polynomial, rational, exponential, and logarithmic equations; graphing functions using transformations (absolute value, polynomial, radical, exponential, and logarithmic); and an introduction to statistics.

Geometry

Duration: one year

Intended Level: 9-12

Prerequisites: Algebra I

Course Description: This is a course in Euclidean Geometry. Topics include real world problems involving perimeter, area, volume, and fundamental properties of geometry as they relate to lines, polygons, and circles. The first three trig functions are introduced and used along with Pythagorean Theorem in solving problems. Deductive and inductive reasoning skills are taught in writing 2-column and paragraph proofs.

Geometry Support (elective credit)

Duration: one year

Intended Level: 9-12

Prerequisites: Enrolled in Geometry, based on teacher recommendation and standardized test results

Course Description: This course is designed to increase the time for Geometry instruction. Instruction will include a combination of pre-instruction and reinforcement of topics to support the Geometry curriculum.

Pre-Calculus Algebra

Duration: one semester

Intended Level: 11-12

Prerequisites: Geometry & Algebra II

Course Description: The course covers advanced algebra topics which include rational expressions; solving quadratic, rational, radical and polynomial equations; relations and functions; quadratic and polynomial functions; systems of equations and inequalities; exponential and logarithmic functions; and conic section.

Metro Pre-Calculus Algebra

Metro Course Number: MATH 1425 Pre-Calculus Algebra

Duration: one semester

Intended Level: 11-12

Prerequisites: Geometry & Algebra II

Course Description: This course will be offered as a dual-college credit course through Metropolitan Community College. The course covers advanced algebra topics which include rational expressions; solving quadratic, rational, radical and polynomial equations; relations and functions; quadratic and polynomial functions; systems of equations and inequalities; exponential and logarithmic functions; and matrices.

Metro Trigonometry

Metro Course Number: MATH 1430 Trigonometry

Duration: one semester

Intended Level: 11-12

Prerequisites: Geometry & Algebra II

Course Description: This course will be offered as a dual-college credit course through Metropolitan Community College. The course covers trigonometric ratios, triangles, vectors, circular functions, trigonometric identities, inverse trigonometric functions, trigonometric equations and complex numbers.

Trigonometry

Duration: one semester

Intended Level: 11-12

Prerequisites: Geometry & Algebra II

Course Description: The course covers trigonometric ratios, triangles, vectors, circular functions, trigonometric identities, inverse trigonometric functions, trigonometric equations and complex numbers.

Metro Calculus

Metro Course Number: MATH 2410 Analytic Geometry and Calculus I

Duration: one year

Intended Level: 11-12

Prerequisites: Pre-Calculus Algebra or Metro Pre-Calculus Algebra and Trigonometry or Metro Trigonometry

Course Description: This course will be offered as a dual-college credit course through Metropolitan Community College. This course covers the mathematical tools used to analyze the continuous rate of change between variables. It reviews some principles of pre-calculus and investigates limits, differentiation, and integration. The course includes applications of both differentiation and integration.

Calculus

Duration: one year

Intended Level: 11-12

Prerequisites: Pre-Calculus Algebra or Metro Pre-Calculus Algebra and Trigonometry or Metro Trigonometry

Course Description: This course covers the mathematical tools used to analyze the continuous rate of change between variables. It reviews some principles of pre-calculus and investigates limits, differentiation, and integration. The course includes applications of both differentiation and integration.

Metro Statistics

Metro Course Number: MATH 1410 Statistics

Duration: one semester

Intended Level: 11-12

Prerequisites: Algebra II or permission of the instructor

Course Description: This course requires students to develop a critical and functional understanding of data. Topics include frequency distributions, measures of central tendency and dispersion, probability and probability distribution, sampling concepts, estimating means, variance, standard deviations, proportions and

percentages, hypothesis testing, and correlation and linear regression. Software and calculators are used as appropriate throughout the course.

CTE Math

Course	Course Description	Purpose of the Course
MATH 0910 Pre-algebra	Students solve problems that include fractions, decimals, ratio, proportion, percent, and operations with integers, basic algebraic concepts, and geometry concepts. Students develop basic study skills for mathematics problem-solving and estimation.	This course strengthens basic math skills. Students will have the opportunity to move directly into Math 0960 or Math 1220 or Math 1240. This will be based on the student's ACT math score, or their Accuplacer Math Placement score, or by passing the Math 0910 Up-placement Exam on the first day of class. Check with your teacher/school counselor.
MATH 0960 Beginning Algebra	Students will review and learn basic algebra skills. Students will simplify expressions using all operations, absolute values, and exponent and positive and negative real numbers. Students will solve linear equations and inequalities and their applications. Students will also simplify and solve operations with polynomials which will include factoring, simplifying, and all operations of most types of polynomials. In addition, students will solve and simplifying equations of linear and inequalities. They will create graphs of linear equations, linear inequalities, and systems of linear equations.	This course strengthens basic algebra skills for the academic track and is designed for students who will attend or transfer to a four-year college. The course will prepare the student to complete the minimum general education math class required for many bachelor degree programs. Completion of Math 0960 will qualify a student to enroll into a college level math classes such as MCC's Math 1305 (Quantitative Literacy) , Math 1312, and Math 1410 (Statistics).
MATH 1220 Business Mathematics (4.5 Credit Hours)	Students learn the math skills required to solve problems related to business occupations. Topics include percentages, checking accounts and services, payroll, payroll taxes, cash and trade discounts, property and sales taxes, simple and compound interest, installment purchases, loan payment plans, and annuities.	This course will serve as the math requirements for many Metropolitan Community College programs. Check with your teacher/school counselor to determine if this course is required for your chosen MCC program.
MATH 1240 Technical Mathematics (4.5 Credit Hours)	Students learn the math skills required in career/technical fields. Students review arithmetic operations. Students apply ratios and proportions, measurement concepts, algebraic operations, geometrical relationships and right triangle trigonometry to problem solving of technical applications.	This course will serve as the math requirements for many Metropolitan Community College programs within the technical areas. Check with your teacher/school counselor to determine if this course is required for your chosen MCC program.
MATH 1312 Intermediate Algebra (4.5 Credit Hours)	This course extends student algebra skills from previous courses and provides new learning to prepare students for future mathematics courses. Topics included are: functions and their applications; polynomial, radical, exponential, and rational expressions and equations and their applications; systems of linear equations and their applications; operations on complex numbers; graphing linear, piecewise, and quadratic functions; and solving and graphing inequalities.	This course is not offered at all sites. Please check with your teacher/school counselor. Math 1312 will serve as the required course for many of the MCC programs as well as transfer to some four-year programs. This course serves as pre-req for Nursing at MCC and Methodist. It serves as a pre-req to required gen ed courses at UNO such as Pre-calculus, statistics, and quantitative literacy. It can serve as an elective credit at UNL/UNK and prepare students for College Algebra. Check with your school counselor for more details on transfer.

Science

Physical Science

Textbook: McGraw Hill: Inspire Physical Science

Intended Grade Level: 9 (Required for Graduation)

Duration: Full year, 2 semesters

McGraw Hill Inspire Physical Science brings phenomena to the forefront of learning to engage and inspire students to investigate key science concepts through their three-dimensional learning experience. This program offers hands-on investigations, rigorous science content, and engaging real-world applications in the areas of:

Unit 1: Motion & Forces

Module 1: Nature of Science;

Module 2: Motion; and

Module 3: Forces & Newton's Laws

Unit 2: Energy

Module 4: Work & Energy;

Module 5: Thermal Energy;

Module 6: Electricity;

Module 7: Magnetism & Its Uses; and

Module 8: Energy Sources & the Environment

Unit 3: Waves

Module 9: Introduction to Waves;

Module 10: Sound;

Module 11: Electromagnetic Waves;

Module 12: Light; and

Module 13: Mirrors & Lenses

Unit 4: Matter

Module 14: Solids, Liquids, & Gases;

Module 15: Classification of Matter;

Module 16: Properties of Atoms & the Periodic Table; and

Module 17: Elements & Their Properties

Unit 5: Reactions

Module 18: Chemical Bonds;

Module 19: Chemical Reactions; and

Module 20: Radioactivity & Nuclear Reactions

Unit 6: Applications of Chemistry

Module 21: Solutions;

Module 22: Acids, Bases, & Salts;

Module 23: Organic Compounds; and

Module 24: New Materials Through Chemistry

Biology I

Duration: one year

Intended Level: 10

Prerequisites: 9th grade science course completed.

Course Description: This course will focus on science facts, concepts, principles, theories and models that are important for all students to know, understand, and use. By the end of the course, the student will develop an understanding in and be assessed on the following concepts: the cell; the molecular basis of heredity; the theory of biological evolution; the interdependence of organisms; an understanding of matter, energy, and organization in living systems; the behavior of organisms, the structure of the atom; chemical reactions; conservation of energy and increase in disorder; the periodic table of elements; and acids and bases. Instruction includes lecture, labs and activities, homework, quizzes, unit tests and comprehensive semester finals.

Biology II

Duration: one year

Intended Level: 11-12, with instructor permission

Prerequisites: Grade 9 & 10 science courses completed, and recommend completion of Chemistry.

Course Description: Biology II is a comprehensive survey of general biology that includes biochemistry, cellular biology, molecular genetics and heredity, biotechnology, diversity, structure and function of organisms, ecology, and evolution. The two main goals of the course are to help the student develop a conceptual framework of modern biology and to help the student to gain an appreciation of science as a continual and ongoing process. Instruction for this course, which moves at an accelerated rate, includes lecture, labs, homework, and tests.

Chemistry

Duration: One Year

Intended Level: 11-12

Prerequisites: Grade 9 & 10 Science Courses, Algebra I

Course Description: Chemistry is the study of the composition, structure, properties, and changes in matter. In Chemistry, students develop a strong understanding of atomic structure, chemical properties, periodicity, and reactions while enhancing critical thinking and lab skills through hands-on experiences. Chemistry is math-intensive and requires the use of algebra to solve problems. This college preparatory class is beneficial for all students going to college, not just students planning to major in science.

Honors Chemistry

Duration: One Year

Intended Level: 11-12

Prerequisites: Grade 9 & 10 Science Courses and Algebra I with a "B" or better (or recommendation from Math/Science Teacher).

Course Description: Chemistry is the study of the composition, structure, properties, and changes in matter. In Chemistry, students develop a strong understanding of atomic structure, chemical properties, periodicity, and reactions while enhancing critical thinking and lab skills through hands-on experiences. Chemistry is math-intensive and requires the use of algebra to solve problems. Students are expected to have strong independent study habits. Honors Chemistry is a more rigorous course for students with aptitude and interest in the physical or medical sciences.

Physics

Duration: one year

Intended level: 11-12 or instructor permission

Prerequisites: Successful completion of Geometry, taken/enrolled in Algebra 2

Course Description: An introductory course in the concepts of physics. This class will build on the principles that students learn in Physical Science. This class will cover all major disciplines in Physics from a big picture point of view. While some math will be necessary in understanding some concepts, this class does not emphasize the mathematical treatment of physics. Simple investigations of physics will be used in addition to class demonstrations, and students will work with how lab data supports the concepts of physics.

Anatomy/Physiology

Duration: one year

Intended Level: 11 – 12, with instructor permission

Prerequisites: Grade 9 & 10 science courses completed and recommend completion of Chemistry.

Course Description: Anatomy & Physiology is a year course designed for the student who is interested in a medical or health career. Emphasis for this class includes the structure and function of the ten major systems of the human body. Class includes labs that require the dissection of specimens. Instruction includes lecture, labs, homework, and tests.

Environmental Science I

Duration: one year

Intended Level: 11-12

Prerequisites: Grade 9 & 10 science courses completed.

Course Description: Environmental science focuses on making students knowledgeable of the major environmental problems facing humans today. Major emphasis is placed on water and air pollution, sewage, land and wildlife management, ecology, and energy consumption problems. Methods of instruction are lecture, labs, tests and research papers.

Earth Science:

Duration: one year

Intended Level:11-12

Pre-Requisites: Algebra 1 Physical Science

Course Description: A more advanced look at Earth Science with an emphasis on STEM and Project Learning. Based

on NGSS Science Standards. Topics include: Earth's Processes, Atmosphere and Meteorology(weather), Oceanography, Geologic Time, Astronomy and Space. Geared toward students pursuing careers in science, math, engineering, and natural sciences. Students should expect to be responsible for: Lab work, short and long-term projects, and presentations in addition to regular classroom activities. Field work depends on weather and transportation.

Ecology

Duration: one year

Intended Level: 11-12

PreReq. - Physical Science and Biology, Algebra I

Course Description: A study of ecology is important to understand in today's world. Ecology is the study of the relationships between living organisms, including humans, and their physical environment; specifically, ecology identifies and explains the holism, or critical connections, between plants and animals and the world around them--and how those relationships affect the planet. Through this understanding, ecology provides information about how to use Earth's resources responsibly in order to leave a healthy environment for future generations. Topics to be covered: ecology and evolution, interspecies and intraspecies relations, mass extinctions, population and landscape ecology. The scope of ecology is as wide as the diversity of life on the planet. From bacteria in lakes to animals living in the arctic, ecologists study all types of environments, or ecosystems. Understanding all of these continually changing factors is overwhelming and difficult to grasp. Second semester will have a concentration and focus on Ecosystem and natural resource management, environmental planning, history of environmental protection, the roles of federal and state agencies, environmental law, environmental ethics, and professional skills relevant to those interested in land-management related careers in the public and private sector.

Zoology

The course gives an introduction to zoology, with particular emphasis on the morphology and systematics of both vertebrates and invertebrates. In addition, the students should acquire basic knowledge in ethology, and human ecology. Zoology is the study of animal life. Zoologists research everything they think to ask about animals, including their anatomy and interrelationships, their physiology and genetics, and their distributions and habitats.

STEM I

Duration: one year

Intended Level: 9-10

STEM 1 is a hands-on class where each semester is broken down into smaller project sessions. We will do things such as 3D CAD modeling as it relates to 3D printing, laser cutting, etc. We will also learn some of the basics of robotics, welding, mechanical and computer engineering, etc. This class will challenge the norms and bring a new view to what the student's usual classroom setting is like. For every session spent explaining and plotting, there will be 5-6 hands on sessions where the kids will be experimenting, playing, and learning through trial and error.

Robotics

Duration: one year

Intended Level: 11-12

Robotics will build off of the ideas learned in STEM 1 but take some new twists. Instead of smaller chunks, in Robotics the chunks will be significantly larger. We also will dive more into manufacturing engineering and the inner working of manufacturing itself. We will challenge the kids to create, innovate, and invent in this class offering. This is the class where the relationship built with 3M and SECC will come into play. We will be using state of the art FESTO units to fully engage in automation as seen in the real world and hope to begin learning lateral logic (Allen-Bradley Systems) along the way. This class should either be for kids coming from STEM 1 or kids who already have some advanced growth mindsets and are looking for a challenge to that.

Social Science

Physical/World Geography

Duration: one semester

Intended Level: 11th grade

Prerequisites: none

Course Description: This course is designed to give students an understanding of the world around them. The course will emphasize map work, climate study, and landforms, as well as study the historical, political, and cultural aspects of different countries of the world. This class will give the students a world perspective to view events of the day.

American History

Duration: one year

Intended Level: 10th grade

Prerequisites: none

Course Description: This course is designed to give students a background in the development of the United States since the early 1900s, the history surrounding Pre-WWII and continues to the present day. A major emphasis is placed on the political, economic, and historical events of each decade. Emphasis is also placed on understanding and applying these historical events to the student's life today.

World History

Duration: one year

Intended Level: 9th grade

Prerequisites: none

Course Description: World History is an in-depth chronological view of the world from the early civilizations (Romans, Greeks, Egyptians, and Mesopotamia) to present day. Major topics covered include the development of religion, government, science, commerce, philosophy and the arts through the study of imperialism, colonialism, militarism, nationalism and a series of global wars.

American Government

Duration: one semester

Intended Level: 12th grade

Prerequisites: none

Course Description: American Government is a one semester, required course, for seniors. This course studies the American government and political system. Major topics covered include the Constitution and its underlying philosophy; the structure and function of the national government; the American political process; the Executive Branch, Legislative Branch, and the Judicial Branch; as well as Nebraska's state and local governmental structure.

Economics

Duration: one semester

Intended Level: 11th - 12th grade

Prerequisites: none

Course Description: Economics is a one semester, required course. This course studies the functions of economics and economic systems with an emphasis on supply and demand, the role of government and financial institutions, production, labor, and fundamental economic problems.

Psychology

Duration: one semester

Intended Level: 11th - 12th grade

Prerequisites: none

Course Description: This course outlines the major theories of psychology, human development and the basis of human behavior. Students will explore topic including psychological methods, human development, heredity and environment, biological influences on behavior, understanding personality, principles of learning, remembering and forgetting, sensation and perception, motivation and emotions, and coping with stress.

Sociology

Duration: one semester

Intended Level: 11th - 12th grade

Prerequisites: none

Course Description: This course outlines the major theories of sociology and explores the impact of culture. Cultural and group behavior are studied through a focus on topics such as socialization, social organizations, social inequalities (social classes, discrimination), deviance and conformity, social control, race and ethnic relations, gender roles, and social institutions.

Metro American National Government

Metro Course Number: POLS 2050 American National Government

Duration: one semester

Intended Level: 11th - 12th grade

Prerequisites: Permission of the instructor

Course Description: This course is an introduction to American national government, including a study of the structural function of the political system and the elements of constitutionalism, republicanism, and federalism. It includes the party system and an analysis of the U.S. Constitution. The course is a descriptive, institutional approach with considerable attention to the policy-making process.

Metro US History

Metro Course Number: HIST 1010 US History to 1877 and HIST 1020 US History from 1865 to Present

Duration: one year

Intended Level: 11th - 12th grade

Prerequisites: Permission of the instructor

Course Description: This course is offered as a dual-college credit course through Metropolitan Community College. The first semester is a survey of American history from Archaic peoples through Colonial America and ending at the American Civil War and Reconstruction. The second semester begins with America's western frontier, and then continues through the Gilded Age, the Spanish-American War, World War I, the Jazz Age, the Great Depression, World War II, the Cold War, and present day.

AP Metro United States Government and Politics

Duration: one year

Intended Level: 10th - 12th grade

Prerequisites: none

Course Description: AP United States Government and Politics is an intensive study of the formal and informal structures of government and the processes of the American political system, with an emphasis on policy making and implementation. This course is designed to prepare students for the AP Exam. This course is for all intents and purposes taught on a college level, and it requires a substantial amount of reading and preparation for every class. The objectives of this course go beyond a basic analysis of how our government “works.” Students will develop a critical understanding of the strengths and weaknesses of the American political system, as well as their rights and responsibilities as citizens. This class is designed to meet AP standards and requirements. The class will prepare students to take the AP American Government test in the spring. Students are encouraged to prepare for and to take the AP test.

World Civilizations from Prehistory to 1500

Duration: one semester

Intended Level: 10th - 12th grade

Prerequisites: none

Course Description: This course is a dual credit course through Metropolitan Community College. This course surveys the history of selected civilizations from the origins of the first human civilizations to the Renaissance. It focuses on the political, economic, social, cultural, and technological contributions of these civilizations, individually and collectively, to the modern world.

World Civilizations from 1500 to Present

Duration: one semester

Intended Level: 10th - 12th grade

Prerequisites: none

Course Description: This is a dual credit course through Metropolitan Community College. This course surveys the history of selected civilizations from the Renaissance to the modern day. It focuses on the political, economic, social, cultural, and technological contributions of these civilizations, individually and collectively, to the modern world.

Current Affairs

Duration: one semester

Intended Level: 9-12

Prerequisites: none

Course Description: Current Affairs is a course designed to give students an understanding of the events that surround them locally, nationally and around the world. The course emphasizes discussion of the daily news through the Omaha World Herald and national news through Newsweek. Students also research several issues that affect an individual throughout the nation and world; homelessness, child-domestic abuse, cloning, euthanasia, death penalty, women’s rights, etc.

Post WW2 Military History

Duration: one year

Intended Level: 10-12

Prerequisites: complete World History

Course Description: This course is a comprehensive study of the history of military conflicts in the United States from the Korean War to the present. This course will concentrate on the buildup to the conflicts and how they were resolved. This course will also focus on the innovations and changes in strategy, tactics, organization, and technologies used during these conflicts. Students will read and analyze a variety of sources on the short- and long-term political impacts these military engagements had on the United States and the international community.

Sports Media

Duration: one year

Intended Level: 9-12

Prerequisites: permission from instructor

Course Description: This class is designed to teach all aspects of media interaction with sports. We will explore sports media as a career, utilizing journalism skills like interviewing, reporting, blogging, working with coaches and athletic directors, staging and covering press conferences, statistics, etc. The goal of this course is to showcase all of the great accomplishments by our sports teams at DC West.

World Languages

Spanish I

Duration: one year

Intended Level: 9-12

Prerequisites: none

Course Description: An introduction to basic language techniques and patterns. Emphasis is placed on vocabulary, present tense verbs (regular and irregular), time, adjective agreement, numbers, days of the week, months, the present progressive verb form, simple conversation, and culture and customs of Spain, Puerto Rico, Texas, Costa Rica, and Chile. Grades will be awarded based upon tests/quizzes, daily work, projects and extra credit. The Spanish text and workbook, entitled “Exprésate 1”, are used, along with the teacher provided supplemental materials.

Spanish II

Duration: one year

Intended Level: 10-12

Prerequisites: Spanish I

Course Description: Continuation of Spanish I. Emphasis is placed on the past tense verbs (regular and irregular), indirect and direct objects and their placement with verbs, positive and negative commands, reflexive verbs, and culture and customs of Mexico, Argentina, Florida, the Dominican Republic, and Peru. The Spanish text and workbook, entitled “Exprésate 1” are used, along with teacher provided supplemental materials. Grades will be awarded based upon tests/quizzes, daily work, projects and extra credit.

Spanish III

Duration: one year

Intended Level: 11-12

Prerequisites: Spanish II

Course Description: A further in-depth study of the Spanish language and culture. Emphasis is placed on expanded vocabulary, imperfect and preterite verb tenses, future verb tense, conditional verb tense, comparative and superlative forms, cultural exploration (Mexico City, Cuzco, Santo Domingo, Miami, and San Jose) and conversational activities. Grades will be awarded based upon tests/quizzes, daily work, projects and extra credit. The Spanish text and workbook, entitled “A Exprésate 2” are used, along with teacher provided supplemental materials. A short novel will also be read during the second semester.

Spanish IV

Duration: one year

Intended Level: 11-12

Prerequisites: Spanish III

Course Description: A continuation of Spanish III. Emphasis is placed on complex language forms and verb tenses, continuation of vocabulary enlargement, and comprehension of selected readings. A continued effort toward fluency and understanding of other people and cultures (Segovia, San Juan, Santiago, El Paso, and Buenos Aires) is required. Grades will be awarded based upon test/quizzes, daily work, projects, field trips and extra credit. The Spanish text and workbook, entitled “Exprésate 2” are used, along with teacher provided supplemental materials. A short novel will also be read during the second semester.

French I

Duration: one year

Intended Level: 9-12

Prerequisites: none

Course Description: Students taking French I will be introduced to the beauty of the French language and the culture of the French-speaking world. The emphasis of this class will be on attaining a solid foundation of vocabulary and grammar with practice in all four basic language skills: listening, speaking, reading, and writing. Evaluation is based on daily class participation, homework, quizzes, tests, and oral presentations.

French II

Duration: one year

Intended Level: 10-12

Prerequisites: French I

Course Description: French II is a continuation of the French I course. After a review of the highlights covered in the French I course, students will continue with their acquisition of French vocabulary and grammar. Evaluation is based on daily class participation, homework, quizzes, tests, oral presentations, and projects.

French III

Duration: one year

Intended Level: 11-12

Prerequisites: French II

Course Description: French III is a continuation of the French II course. This course will enhance the ability of the students to use the French language in conversation, reading, and writing. Students will also have the opportunity to add to their knowledge of the various cultures of French-speaking countries. Evaluation is based on daily class participation, homework, quizzes, tests, oral presentations, projects, and outside reading.

French IV

Duration: one year

Intended Level: 12

Prerequisites: successful completion of French III

Course Description: French IV is a continuation of the French III course. This course will enhance the ability of the students to use the French language in conversation, reading, and writing. Students will also have the opportunity to add to their knowledge of the various cultures of French-speaking countries. Evaluation is based on daily class participation, homework, quizzes, tests, oral presentations, projects, and outside reading.

UNO French IV

UNO Course Number:

Duration: one year

Intended Level: 12

Prerequisites: successful completion of French III

Course Description:

Computer Technology

Information Technology Applications I

Duration: one semester

Intended Level: 9-10

Prerequisites: Permission from the instructor

Course Description: Students will demonstrate basic skills in the areas of document formatting, word processing, spreadsheet applications, electronic presentation software, Internet use, security issues, and electronic communication. Students will manage computer operations and file storage, identify ethical issues pertaining to information systems, and learn about information technology careers. The class will consist of lectures, when necessary, and lab time to complete assignments. Grading is based on daily assignments, quizzes, tests, and timed writings. This class is only intended for those students who are not confident in their computer skills.

Information Technology Applications II

Duration: one semester

Intended Level: 9-10

Prerequisites: Information Technology Applications I or permission from the instructor

Course Description: Students will review basic formatting of documents, word processing, spreadsheet applications and electronic presentation software. They will explore layout and formatting in desktop publishing and web page development as well as advanced word processing and spreadsheet applications. Integration of software will also be covered. Software applications that will be utilized in class include Microsoft Office, iWork, and iLife software packages. Lecture will occur when necessary and students will be given lab time to complete assignments. Grading is based on daily assignments, quizzes, tests, and projects.

Computer Graphics

Duration: one year

Intended Level: 9-12

Prerequisites: none

Course Description: This course is an introduction to the fundamental skills and terminology for creating and editing digital photographs, basic electronic paint and draw-type computer graphics. The student will use and learn the fundamentals of Adobe's Photoshop Elements to explore basic painting, drawing, and typography concepts. Students will be graded on discussion and participation, projects, homework, and class work.

Computer Science Discoveries:

Duration: one semester

Intended Level: 9-11

Prerequisites: none

Course Description: Designed to be the first computer science course for students who have never programmed before. CS Discoveries is a starting point for Computer Science. Students will explore the impact of computing in society and build skills in digital citizenship and cybersecurity. Beyond learning the fundamentals of programming, students build computational-thinking skills by applying computer science to collaboration tools, modeling and simulation, and data analysis.

Honors Computer Science Principles:

Duration: one year

Intended Level: 10-12

Prerequisite: C or better in Algebra I

Course Description: Computer Science Principles introduces students to the foundations of computer science with a focus on how computing powers the world. Along with the fundamentals of computing, you will learn to analyze data, create technology that has a practical impact, and gain a broader understanding of how computer science impacts people and society. Students who select NOT to participate in the AP exam are expected to take a cumulative, AP comparable, teacher-graded end of course exam.

Web Design 1:

Duration: one year

Intended Level: 10-12

Prerequisites: none

Course Description: Students will demonstrate knowledge of web design and languages, including HyperText Markup Language (HTML) and Cascading Style Sheets (CSS) to create a content rich and visually pleasing website that captures and keeps visitors' interests. Focus will be given to effective page layout, image creation and manipulation, interactivity, content creation, and project management.

Cybersecurity:

Duration: one semester

Intended Level: 10-12

Prerequisites: none

Course Description: Cybersecurity introduces the tools and concepts of cybersecurity and encourages students to create solutions that allow people to share computing resources while protecting privacy. Students will learn cybersecurity topics such as software security, networking, system administration, and the basics of cryptography and programming.

Business

Personal Finance

Duration: one semester

Intended Level: 10-12

Prerequisites: none

Course Description: This course is designed to give the student financial information necessary for life after high school. Topics include consumer economics, buying technology, careers, taxes, budgeting, banking and checking, saving, investing, credit, transportation, housing, and insurance. Grading is based upon daily assignments, tests, quizzes and various special projects.

Metro Personal Finance

Duration: one semester

Intended Level: 10-12

Prerequisites: none

Course Description: This course is designed to give the student financial information necessary for life after high school. Topics include consumer economics, buying technology, careers, taxes, budgeting, banking and checking, saving, investing, credit, transportation, housing, and insurance. Grading is based upon daily assignments, tests, quizzes and various special projects.

Introduction to Business

Duration: one semester

Intended Level: 10-12

Prerequisites: none

Course Description: This course is intended for the student with a general interest in how the business world operates. The course is an introduction to many aspects of business such as economic systems and activity, international business, social responsibility, management and leadership, human resources, career planning, technology, financial management, and production. Grading is based upon daily assignments, tests, quizzes, and various special projects.

Accounting

Duration: one year

Intended Level: 11-12

Prerequisites: none

Course Description: Students will study the accounting cycle for a service business organized as a sole proprietorship and a merchandising business organized as a partnership and corporation. Activities include journalizing and posting transactions, preparing worksheets, completing financial statements and end-of-fiscal period tasks, completing payroll and recording taxes, evaluating stock transactions and utilizing automated accounting software. Grading is based upon application problems, tests, quizzes and various special projects.

Metro Entrepreneurship

Duration: one semester

Intended Level: 10-12

Prerequisites: Personal Finance

Course Descriptions: Students evaluate the business skills and commitment necessary to successfully operate an entrepreneurial venture and review the challenges and rewards of entrepreneurship. Students understand

the role of entrepreneurial business in the United States and the impact on the national global economy. Students prepare a realistic foundational business plan appropriate to the launch of a small business.

Metro Marketing

Duration: one semester

Intended Level: 10-12

Prerequisites: Personal Finance

Course Descriptions: Students learn core concepts and common practices specific to marketing including distributive fields, their functions and interrelationships. Topics include concept and strategies of the marketing mix; the application of marketing concepts in both consumer and business to business environments; and controversial marketing topics, including ethical challenges of advertising.

Industrial Technology

Woods Construction I

Duration: one year

Intended Level: 9-12

Prerequisites: none

Course Description: This is a beginning class in machine woodworking with emphasis on construction and safety. The class requires the use of power tools/machines. The first project (Wooden Castle) is designed to teach safety on each and every machine used in the shop. After lectures and demonstrations on each machine are given, the student must pass a safety test before operating each machine. Grading is based on weekly assignments, tests, lab performance, and finished projects. Students are required to pay for supplies used on their own projects

Woods Construction II

Duration: one year

Intended Level: 10-12

Prerequisites: Beginning Woodworking

Course Description: This is an advanced woodworking course in machine woodworking, emphasizing style, design, finish and construction techniques utilizing larger wood and wood-related material projects. Some extra student expense is involved for project cost. A safety test will be done on all machines. Grading is based on weekly assignments, tests, lab performances, and finished projects. Students are required to pay for supplies used on their own projects

Construction Management & Applied Carpentry

Duration: one year, two class periods

Intended Level: 11-12

Prerequisites: Beginning Woodworking, Construction Technology

Course Description: This is a class designed to give the student an opportunity to appreciate and experience the processes of residential construction and real life scenarios and situations in construction management. All skills in residential home building, including: rough carpentry, finish carpentry, plumbing, electrical, HVAC, roofing, drywall, cabinetry, painting and staining will be applied. Also, after completion of this course, the student will have a better understanding and appreciation of accounting, business management, math, time management and communication in relation to construction management. Grading is based on class participation, performance, accountability and attitude, as if the student were employed.

Intro To Architecture

Duration: 1st semester

Intended Level: 11-12

Prerequisites: Mechanical Drafting II

Course Description: This advanced mechanical drawing course is a continuation of Mechanical Drafting II. This is an individual problems course, designed for the individual who has a keen interest in drafting or who is planning a career in the area of drafting or engineering. Auto Sketch and Auto CAD 2006 will be used a majority of the time. Grading will be done on completed drawings.

Welding

Duration: one semester

Intended Level: 10-12

Prerequisites: none

Course Description: This class introduces the basics of welding and its safety. The course is designed for the student who wishes to develop welding skills in flat position arc, oxyacetylene welding, wire feed, brazing and gas cutting. Metals safety test will be given in studied areas. Some extra student expense is involved for project cost. Grading is based on weekly assignments, tests, lab performances, and finished projects. Class is limited to 10-12 students.

CTE Metro Construction Management (Introduction to Carpentry)

Duration: one semester

Intended Level: 11-12

Prerequisites: Basic wood construction class

Course Description: This course covers the safe use of hand and power tools. Focus is on proper set up of tools, manufacture of jigs and templates are practiced. The student takes part in a laboratory project involving all stationary and hand power tools, as well as carpentry hand tools.

CTE Metro Construction Management (Floor, Wall, Stair and Ceiling Framing)

Duration: one semester

Intended Level: 11-12

Prerequisites: CTE Metro Construction Management (Introduction to Carpentry)

Course Description: This course deals with floor framing, wall parts, wall construction and installation of ceiling joist. A full scale house is constructed by the students in the indoor laboratory.

Visual and Performing Arts

Art:

Art I - Theory and Fundamentals of Art

Duration: one semester

Intended Level: 9-12

Prerequisite: none

Course Description: This course is a prerequisite for all other high school art classes. It is an overview of the arts and includes a broad variety of media and materials used to study the elements and principles of design, color theory, drawing, painting, illustration, and printmaking. Students will be graded on discussion and participation, projects, homework, craftsmanship, and class work.

Art II -Two-Dimensional Design & Illustration

Duration: one semester

Intended Level: 9-12

Prerequisite: Art I

Course Description: The fundamental skills and various techniques from Art 1 form the basis for Art 2. This course is an in depth study of composition and format that explores the principles of design and knowledge of the art elements. Design projects will involve the development of strong images through various medias in conjunction with typography to communicate ideas and expression. Students will be graded on discussion and participation, projects, homework, craftsmanship, and class work.

Basic Drawing

Duration: one semester

Intended Level: 9-12

Prerequisite: Art I

Course Description: An intermediate drawing and design course dealing with fundamental drawing techniques in pencil, color pencil, charcoal, pastels, pen and ink, ink wash, and mixed media. Students will use drawing tools and various medias to apply knowledge of design with line, value, texture, form, space, and perspective. Students will be graded on discussion and participation, projects, homework, craftsmanship, and class work.

Basic Painting

Duration: one semester

Intended Level: 9-12

Prerequisite: Art I

Course Description: This course is an introduction to the study and concepts of painting through the use of various medias including acrylics, tempera, oils, pastels, and watercolor. Students will examine techniques, tools, composition, color theory, formal properties and spatial properties of painting. Students will be graded on discussion and participation, projects, homework, craftsmanship, and class work.

Drawing

Duration: one semester

Intended Level: 10-12

Prerequisite: Art I, Basic Drawing

Course Description: The fundamental skills and drawing techniques from Basic Drawing form the basis for Drawing. This course deals with advanced drawing techniques in pencil, colored pencil, charcoal, pastels, pen and ink, ink wash, and mixed media. Students will organize and compose extended drawings by manipulating various art elements. The development of images and expression is an integral aspect of this course. Students will be graded on discussion and participation, projects, homework, craftsmanship, and class work.

Painting

Duration: one semester

Intended Level: 10-12

Prerequisite: Art I, Basic Painting

Course Description: The fundamental skills and techniques from Basic Painting form the basis for Painting. This course allows students to explore painting through individual study in multiple medias with emphasis on art movements and creative approaches used by artists. Construction of stretcher strips, masonite forms, stretching canvas, and framing for display will be utilized in this course. Students will be graded on discussion and participation, projects, homework, craftsmanship, and class work.

Sculpture & Ceramics

Duration: one semester

Intended Level: 9-12

Prerequisite: Art I

Course Description: This course is designed to provide a broad understanding of sculpture and ceramics. The student will experience both additive and subtractive sculpture, freestanding, and kinetic. As students research artists and sculpture, they will learn to work with a variety of materials and techniques in a 3-dimensional space. Students will be graded on discussion and participation, projects, homework, craftsmanship, and class work.

Advanced Art / Independent Study

Duration: one semester

Intended Level: 10-12

Prerequisite: two semesters of art including Art I

Course Description: This course is set up for the serious art student who is willing to work independently by utilizing self-discipline, time management, and problem solving. The student will develop original ideas working with a wide variety of media and techniques. The student will critique own work as well as receive evaluations from the instructor. Matting and framing of projects will be executed for display or exhibit. Students will be graded on discussion and participation, projects, homework, craftsmanship, and class work.

Vocal & Instrumental Music:

Choir

Duration: year

Intended Level: 9-12

Prerequisites: none

Course Description: A vocal music course that will provide students with a variety of choral styles with an emphasis on singing proficiency, vocal tone production, basic music theory, and performance. Opportunity for solos or small ensembles will be made available as wanted and needed. Grading will be based on classroom participation, cooperation, attitude, homework, tests, quizzes, and performance attendance (required).

Band

Duration: one year

Intended Level: 9-12.

Prerequisites: permission from the instructor

Course Description: A year-long instrumental music course for moderate to advanced skilled players.

Performance requirements include pep band, marching, concerts, and music contests. Opportunities for solos and small ensembles are available. Grading is based on participation, cooperation, attitude, assignments, and performance attendance (required).

Music Appreciation/Theory

Duration: one semester

Intended Level: 9-12

Prerequisites: none

Course Description: This course is for students wanting to further their musical knowledge. Students considering a career in music are strongly encouraged to enroll. The class is designed to inspire, motivate, and educate students in multiple facets of music. Several topics will be covered, including, but not limited to: music theory, music history, composers (past and present), advocacy (the importance of music), composition (writing music), ear training, basic keyboarding (piano), and the role of music in society.

Introduction to Guitar

Duration: one semester

Intended Level: 9-12

Prerequisites: none

Course Description: Beginning guitar is a one semester course designed to give a student the fundamental skills that would allow him/her to play simple melodies and basic chords for simple songs. Basic skills include identifying guitar parts, string names, tuning, hand and finger positions, strumming, picking, and chords. Grades will be based on weekly evaluation of assignments, quizzes and tests.

Introduction to Piano

Duration: one semester

Intended Level: 9-12

Prerequisites: none

Course Description: Introduction to Piano is a one-semester course designed to develop basic piano playing skills. Time in class will be spent both on and off the keyboards. When playing, the students will work

individually and in small groups to master the techniques of playing. Time will also be spent in group instruction on musical notation and theory.

Bucket Drumming

Duration: one semester

Intended Level: 9-12

Prerequisites: none

Course Description: Learn to play percussion through the fun and engaging art of bucket drumming. Find your rhythm, and increase your motor skills and hand/eye coordination. Bucket drumming can be a social activity to promote ensemble skills or a solo exercise for students who aspire to be drummers. It can be used as a vessel for preparing, practicing, and presenting percussive techniques. This class is intended for students who are interested in learning percussion and creating music with other people.

Physical Education/Health

Health

Duration: one semester

Intended Level: 10-12

Prerequisites: none

Course Description: This class is designed to give the student knowledge of useful life skills and decision making abilities. The class emphasis is on CPR, basic first aid, and other basic response skills to life threatening problems. Human sexuality, childbirth, sexually contracted diseases and abusive relationships are also covered. Two research papers are required. Method of instruction includes lectures, films, and guest speakers.

Metro Nutrition

Duration: One Semester

Intended Grade Level: 11-12

Prerequisites: Health

HLTH 1050: Nutrition represents an important health concern throughout the life cycle. This course includes human nutrition, nutrition in healthcare through the lifecycle, introduction to therapeutic and modified diets, nutritional assessment and analysis, and a brief introductory overview of nutrition support. This course also covers gastrointestinal, cardiovascular, respiratory, and endocrine systems as related to medical nutrition therapy.

Metro Foundations of Public Health

Duration: One Semester

Intended Grade Level: 11-12

Prerequisites: Health

Foundations of Public Health (HLTH 1510): Foundations of Public Health provides students with a foundational knowledge of public health's historical contributions; the ethical bases; key terms and concepts; system organization; and the social, behavioral, psychological, and biological factors that contribute to the specific individual and community health outcomes through interactive learning strategies and the application and integration of concepts to understand and prevent current public health problems and those facing public health in the 21st century.

Metro Medical Terminology (I and II)

Duration: One Semester

Intended Grade Level: 11-12

Prerequisites: Health

HIMS 1120: Students gain a solid foundation of medical terminology through the introduction of prefixes, suffixes, word roots, abbreviations, terms, and symbols. It emphasizes understanding the medical vocabulary as it applies to the anatomy, physiology, pathology, diagnostic procedures, and therapeutic procedures of the human body. Students participate in an in-depth study of medical terms, including correct spelling and pronunciation, in order to be prepared to enter their professions in the healthcare field.

HIMS 1130: Students utilize the principles of medical word building to develop an extensive medical vocabulary used in healthcare occupations. This advanced course presents detailed anatomy and physiology, specialty medical areas, clinical procedures, laboratory tests, medical terms, and abbreviations. Students study practical applications with case reports, operative and diagnostic tests, and laboratory and x-ray reports. The course also emphasizes correct spelling and pronunciation. Students will be able to comprehend medical records, communicate among medical professionals, and have a high-level overview of medical terms.

Metro Intro to Medical Law and Ethics

Duration: One Semester

Intended Grade Level: 11-12

Prerequisites: Health

HIMS 1150: This course gives a foundation in the federal and state laws of the medical profession and ethical issues associated with working in a healthcare setting. It explores HIPAA regulations in detail. Topics include professional, social, and interpersonal healthcare issues. Coverage also includes the identification of measures to promote confidentiality as major changes in electronic health record technology occur. Students learn investigation of techniques to maintain office safety as well as the safety and confidentiality of patients and medical records.

Metro Healthcare Careers

Duration: One Semester

Intended Grade Level: 11-12

Prerequisites: Health

HIMS 1111: This course provides an overview of the healthcare field. Topics include healthcare delivery systems, history of healthcare, careers in healthcare, personal qualities of healthcare workers, principles of teamwork, time management, human growth and development, cultural diversity, safety issues, and computer technology in healthcare settings. Current issues in healthcare are addressed in order to enrich students' understanding and breadth of knowledge of the U.S. healthcare system and the roles and functions of various healthcare professionals.

Physical Education

Duration: one year

Intended Level: 9-10

Prerequisites: none

Course Description: Physical development of flexibility, strength, and endurance through running, jumping, circuit training, and weight training. This class is used to gain knowledge in areas relating to physical fitness for a better understanding of the importance and benefits of exercise. Students will participate in activities/games that enhance muscular endurance and strength and will learn the fundamentals of various team sports.

Weight Training

Duration: one year

Intended Level: 9-10

Prerequisites: none

Course Description: During this class the students are able to participate in a weight lifting program, aerobic program, or a plyometric program. This course would be very beneficial for anyone that is looking to improve his/her overall strength and conditioning.

Leadership Weight Training

Duration: one year

Intended Level: 11-12

Prerequisites: none

Course Description: This course is designed to give students the opportunity to build their knowledge on different weight training concepts and techniques used for obtaining optimal physical fitness. Students will benefit from comprehensive weight training and cardiorespiratory endurance activities. Students will learn the fundamentals of more advanced weight training, strength training, aerobic training, and overall fitness training and conditioning. Course includes both lecture and activity sessions. Students will be empowered to make wise choices, meet challenges, and develop leadership skills in fitness and in life. During this class the students are able to participate in a weight lifting program, aerobic program, or a polymer program. This course would be very beneficial for anyone that is looking to improve his/her overall strength and conditioning. If a student has already taken Weight Training I, the training will be at a more advanced/higher level.

UNO Leadership Strength Training/Advanced Weight Training

Duration: one year

Intended Level: 10-12

Prerequisites: coach/instructor's discretion

Course Description: This course is designed to enhance strength and conditioning skills to an advanced level from the skills already possessed by the student. Course content will include information necessary to analyze the demands and goals of sport, and to be able to design and implement a comprehensive strength & conditioning program. The modules of instruction may include lecture, assignment readings, demonstrations, discussions, practical experience and student presentations.

Recreation/Lifetime Activities

Duration: one semester

Intended Level: 11-12

Prerequisites: none

Course Description: This is a Physical Education class geared towards learning the benefits of recreation and lifetime activities. This class will include activities such as volleyball, fishing, bowling, biking, ice skating, basketball, golf, and other activities relating to recreation and lifetime use. The students will still learn all of the benefits that physical education has to offer in the future.

Aerobics/Yoga

Duration: one semester

Intended Level: 9-12

Prerequisites: none

Course Descriptions: Students will be exposed to a variety of exercise techniques aimed at increasing flexibility, endurance, and athletic ability. Aerobic and yoga routines, as well as, team games will be utilized in instructing students to achieve their goals.

UNMC High School Alliance

Duration: one year

Intended Level: 12 (upon selection of the UNMC Community)

Prerequisites: Health -Students admitted to the UNMC Alliance will take classes on the UNMC campus every day from 1 p.m. to 3 p.m. Because school districts have different calendars, the UNMC Alliance follows the

Omaha Public Schools calendar. If school is not in session but the UNMC Alliance does have class, students are still required to attend. This is a weighted class for students that are selected.

Course Description: **Course offerings for 2019-20 include:**

- Biomedical Research
- Exploration of Human Anatomy
- Human Genetics – Medical and Societal Implications
- Infectious Disease – Microbes: The Good, The Bad, The Ugly
- The Study of Patient Care
- Pathology – Connecting Cells to the Clinic: Fundamentals of Disease
- Introduction to Pharmacy
- Community Health - Outside the Individual: Investigating the Public's Health
- Intro to Behavioral Health: Concepts and Careers from Family Therapy to Forensic Psychiatry
- The Biology and Prevention of Cancer

Family and Consumer Sciences

Culinary Skills

Duration: one semester

Intended Level: 9-12

Course Description- Students will be introduced to the basics of food planning and meal preparation. The emphasis of this class will be on building familiarity with basic kitchen skills, while also exploring the vast world of culinary possibilities! My goal for everyone is to become more comfortable with the task of feeding oneself and others. Evaluation is based on daily class participation, homework, quizzes, projects, and kitchen labs.

Culinary Skills II

Duration: one semester

Intended Level: 10-12

Prerequisites: Culinary I

Course Description: This course is designed to provide students with an advanced curriculum which is focused on the foodservice industry and provides training in workplace and culinary skills, interpersonal and communication skills, as well as an exposure to the areas of restaurant management and career exploration.

Interior Design

This course explores housing selection and interior design through hands-on projects. Students will design interior renderings, floorplans, furniture arrangements, window treatments, and storage considering the elements and principles of design.

Fashion Design

In this class, students explore the definition and application of elements and principles of design in fashion and/or textiles. Design trends, inspiration sources, technical tools (hand and computer), fiber/fabric types and much more are explored through examples, exercises, critiques and creative projects. Basic sewing construction is learned in this class. Students are exposed to career opportunities and skills necessary for the design career fields of fashion and/or textiles.

Interdisciplinary Studies

Investigating Careers/College Preparation

Duration: one year

Intended Level: 12

Prerequisite: College-bound students

Course Description: Careers Class is a senior oriented class that focuses on Career Pathways, College Choice and Job preparation. The Career Pathway segment starts with personality and psychological evaluation tests that direct the students to career opportunities that match their personalities. Representatives from the professional world, colleges and vocational schools are invited to speak to the students about job requirements and future opportunities. The College Choice segment is a year-long decision process in which the students research the best college for their interest in a particular field of study. The students then take campus visits and meet with future students and professors in the field that they choose. College applications, scholarships, and financial aid applications are reviewed and completed during class time. The Job Preparation segment starts with the shadowing of a professional in a chosen area. All students will complete one job shadow per semester. This will allow them to explore a different field of the job market. The students will also complete a Real Life Simulation Project. The project will allow them to set up and complete a budget sheet that allows them to learn the value of budgeting money and spending needs.

Special Education

(Special Education courses are only offered to students on an Individualized Education Plan)

Vocational Skills

Duration: one year

Intended Level: 12

Prerequisites: none

Course Description: This course will include activities to prepare the student for the world of work. Students will be assigned job shadowing experiences and/or vocational work experiences to a jobsite outside of the school with the possibilities of future employment. Students will gain and maintain vocational skills.

Resource Study Skills

Duration: one year

Intended Level: 9-12

Prerequisites: permission from the instructor

Course Description: Students will focus on techniques needed to become better organized, work independently on their own assignment completion and improve study habits. This class is only available to special education students.

English as a Second Language (ESL) English Language Learners (ELL)

ELL Beginning English

Duration: one year

Intended Level: 9-12

Prerequisites: None

Course Description: This course is designed for the ELL student who is just entering a US school for the first time. Focus is on everyday conversational English and extensive vocabulary connected with pictures. Key topics cover home, family, workplace, community, healthcare and academic studies. Sub-topics include everyday language, people, housing, food, clothing, health, community, transportation, areas of study, plants and animals, work and recreation, and sports. Spelling and beginning skills in writing in English are introduced. English grammar is also covered.

ELL Intermediate English
